

MANUFACTURING PLATFORM PROFILE

Playground manufacturing. Reengineered.

Designed by AG. Engineered in India. Built for the World.

AG CONCEPT VISUAL - NOT PHOTOGRAPHY OF AN AG-OWNED FACILITY

A controlled manufacturing journey.

Product design, cultural storytelling, engineering, component packages and a qualified India manufacturing network - organised around reviewed specifications and project delivery.

DESIGN > ENGINEER > PROTOTYPE > MANUFACTURE

QA > PACK > EXPORT > INSTALL > MAINTAIN

Scope for enquiry: outdoor and indoor play, soft play, adventure, trampoline, water play, fitness, sports, surfacing, park furniture and spare parts.

Development scope only. Partner appointment, ownership, capability, capacity, compliance and commercial terms require verification. No factory ownership or product certification is claimed.

From concept to production.

Each manufacturing package should be controlled by an authorised drawing revision, material specification, acceptance criteria and project release.

01 / PRODUCT & COMPONENT SCOPE

Structural metal, stainless steel slides, HDPE/HPL, rotomoulded parts, rope and nets, timber, foam, upholstery, composites, hardware and finish systems. Material grades are requests until reviewed.

02 / ENGINEERING & QUALITY GATES

Brief, NDA, DFM, engineering, prototype, approval, production, QA, packing and export. Evidence may include material traceability, first-article inspection and approved technical documents.

03 / RFQ & COMMERCIAL REVIEW

Five-step RFQ: project; site and users; products and components; engineering and delivery; review and submission. Budget ranges remain unavailable until approved rates, engineering scope and freight are validated.

04 / SAFETY & PROJECT COMPLIANCE

Designed to target applicable international playground safety requirements. Final compliance depends on configuration, installation, surfacing and jurisdiction. A component certificate does not certify the complete playground.

05 / CONTROLLED ACCESS & INTEGRATIONS

Client RFQs are identity-scoped. Factory access is limited to assigned, NDA-signed and released package references. Master BOM, supplier costs, margins and unreleased IP are restricted. CRM, payments and document transfer require separate authorised connections.

Start with a site, drawing or idea.
